Bad Design 1: No Tables and Chairs in Front of KC Foods

Description:

The food outlet does not provide tables or chairs for customers to sit and eat. Customers are forced to stand or leave immediately after purchasing food, reducing comfort and convenience.

Source of Photograph: (CAPTURED PICTURE)

Place:

KC Foods – Campus Food Court

Reasons why the design is bad:

No seating arrangement for customers.

Causes discomfort while eating.

Crowding occurs during peak hours.

Not suitable for elderly people or students carrying bags.

Reduces the overall customer experience.

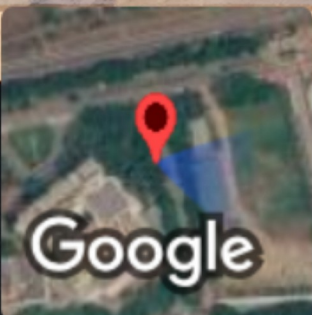

Suggested Improvement:

Provide sufficient tables and chairs.

Arrange seating to avoid congestion.

Include accessible seating for all users.

Maintain cleanliness around the seating area.

Bad Design 2: Menu Board is Not Clearly Visible

Description:

The menu board is placed in a location where customers cannot easily read it. The text is too small or positioned too high, making it difficult to view the available food items and prices.

Source of Photograph: (CAPTURED PICTURE)

Place:

Garnish– Order Counter

Reasons why the design is bad:

Menu is difficult to read from a distance.

Small font size reduces readability.

Customers spend more time deciding.

Creates longer waiting queues.

First-time visitors may become confused.

Suggested Improvement:

Install a larger menu board.

Use bigger fonts with high-contrast colors.

Position the menu at eye level.

Display digital menus or multiple menu boards.

Bad Design 3: Switch Board Without Labels

Description:

The switches are not labeled, making it difficult for users to identify which switch controls which appliance or light. Users often need to try multiple switches before finding the correct one.

Source of Photograph: (CAPTURED PICTURE)

Place:

Classroom / Laboratory / Office

Reasons why the design is bad:

No indication of switch functions.

Users waste time searching for the correct switch.

Can lead to accidental operation of equipment.

Difficult for new users and visitors.

Poor usability and organization.

Suggested Improvement:

Label each switch clearly.

Use printed stickers or engraved labels.

Group related switches together.

Add indicator lights where necessary.

Maintain a consistent switch arrangement.
